

The City of Beaumont is permitted for a transfer station for solid waste materials. While the current name for our station is the collection materials facility is permitted and run as a transfer station. It is not a landfill and the City is not permitted to operate any landfill operations. The transfer station is located on East Avenue 1100 West Street just the cemetery.

The City transfers solid waste from the facility to the regional landfill site near Okemah by filling roll-off dumpsters which are then picked up by owner and loaded in the landfill.

The City does reduce waste by sorting the material from other debris and placing it in a roll-off dumpster which is then taken to a recycling facility. The City also recycles papers for the commercial which helps delays other costs of treating off solid waste. The City also chips tree limbs and brush into mulch which is free to the public.

The collection station is not for normal household waste. Household waste is to be placed in the dumpsters that are placed near your property. The collection station is the place to take old appliances, furniture, mattresses, carpets, coats, tree limbs, crop building materials such as roofing materials, and other items that do not fit into the dumpster. An exception to this is that any refrigerators or air conditioners must first have the freon removed and then have a tag indicating the freon has been removed. Additionally, some the freon contains, acids, gases are, may be taken to the collection station and should not be placed in the dumpster.

**Prohibited items** that are not accepted are hazardous materials, pesticides, herbicides, solvents, radioactive material, explosives, medical waste, chemicals, printers, computers or large amounts of construction/demolition debris. If you are tearing down a house please contact City Hall so that dumpsters can be brought to your property so you can load large construction debris into the dumpsters. There is no charge for this service.

The City does accept small appliances car tires, truck tires, and tractor tires. There is an additional fee for disposal of these items. You must come into the Hall and
